6-CHAMBER CO₂ INCUBATOR
WITH HUMIDIFICATION

Flora - a new concept in bench top incubation...

- ◆ 12 independant PID temperature regulations - for superior stability
- ◆ CO2 Gasmixing to any user selected set-point
- ◆ O2 regulation by N2 infusion for low oxygen conditions
- ◆ Flow through layout with purge function after lid openings
- ◆ Visible humidification bottle for easy access
- ◆ User interface designed for easy use and safety with interaction with the device done via an APP
- ◆ Foot print designed for lab space at a premium
- ◆ Full data logging
- ◆ 7 gas sample ports for validation
- ◆ 6 independant temperature sensors for validation

Your embryos deserve the best

• Flora Humidified

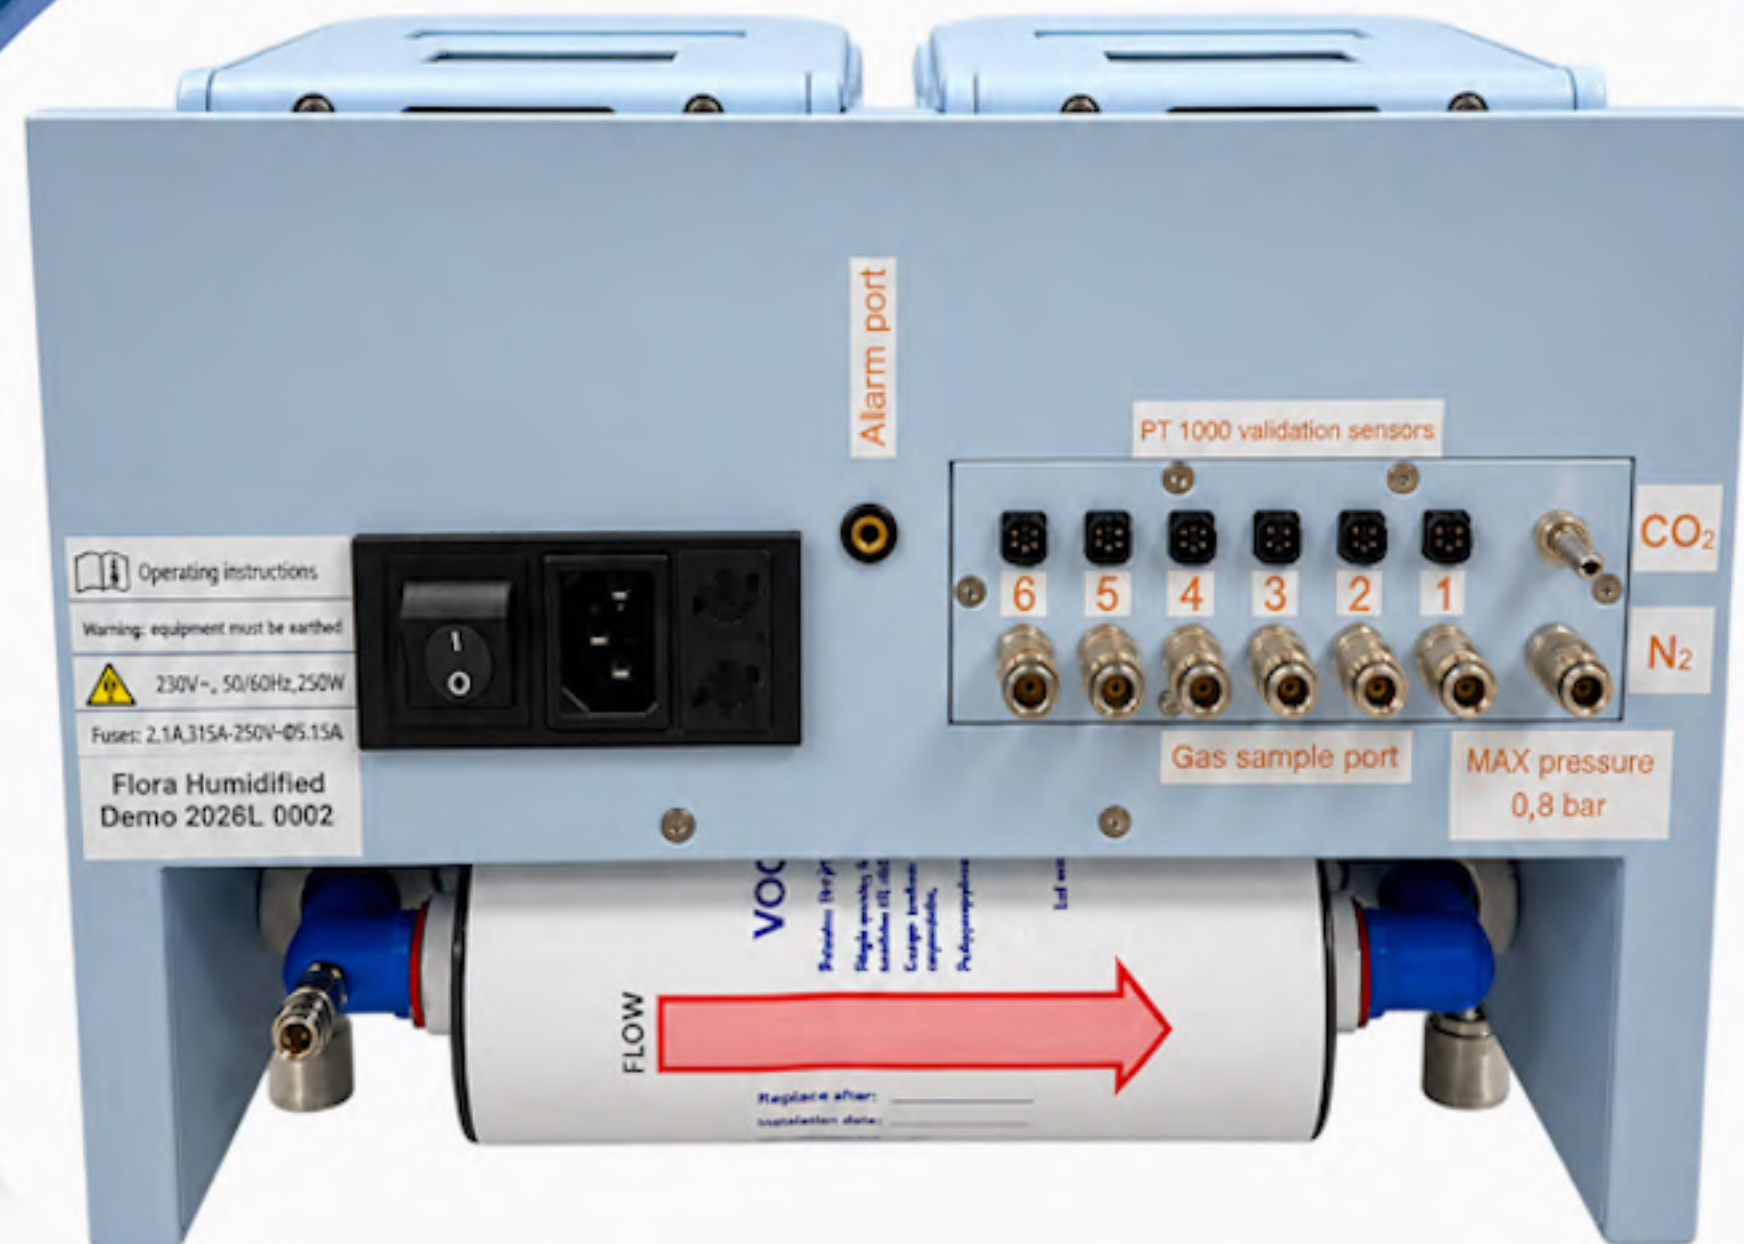

- ◆ One patient - one compartment
- ◆ Heated lid - PID control
- ◆ Heated bottom - PID control
- ◆ Stable uniform temperature
- ◆ Fast recovery of conditions
- ◆ Easy opening and closing with a magnet lock and tracking of user openings in software

Your embryos deserve the best

• Flora Humidified

- ◆ CO2 mixing for correct pH for all bicarbonate buffered medium types. User set set-point
- ◆ O2 control via N2 infusion for reducing the O2 level. Use a high purity N2 source.
- ◆ Continual adjusting of gas concentrations
- ◆ Opening one lid does not affect the compartments that are closed = true undisturbed incubation
- ◆ **Continual gas flow**
- ◆ **Flow stops when the lid is opened**
- ◆ 7 Gas validation ports + inlet for CO2 + CO2

• Flora Humidified

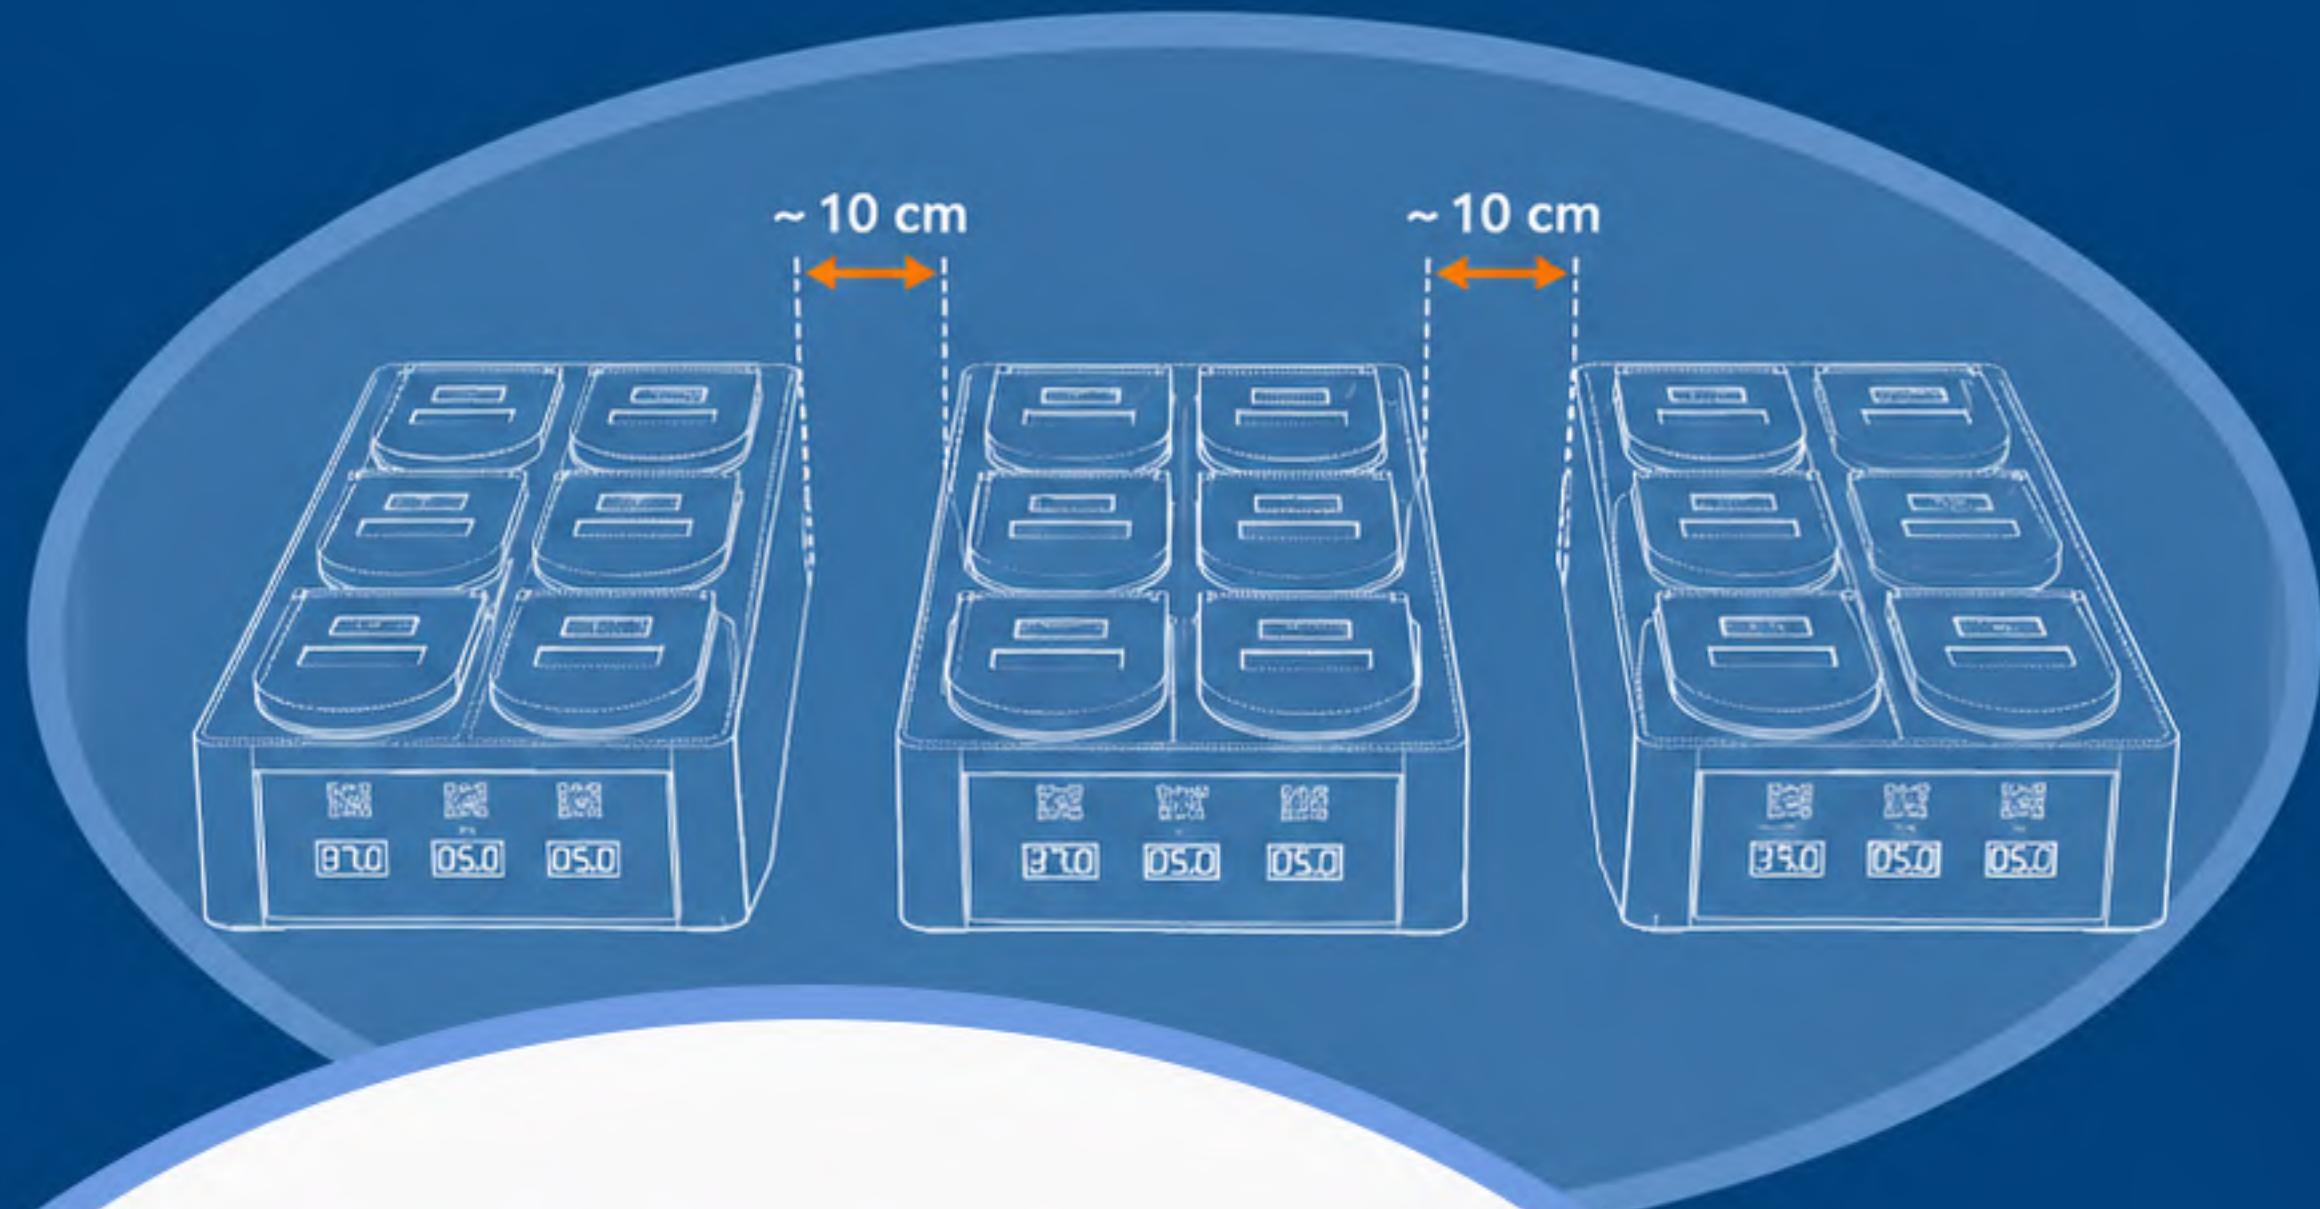

- ◆ User interface via app
- ◆ Scan function group and use. Fast and intuitive
- ◆ Total documentation of patient flow and adjustments done
- ◆ 6 E INK lid display for patient information

Your embryos deserve the best

• Flora Humidified

- ◆ Footprint that fits a laboratory table
- ◆ Narrow design with space between units for side access
- ◆ Modular and safe. 1 Patient per compartment, only 6 share precision controls
- ◆ Safer than higher volume single built units in case of an emergency
- ◆ Capacity 6-12-18-24-32
- ◆ Can be stacked vertically as well

Your embryos deserve the best

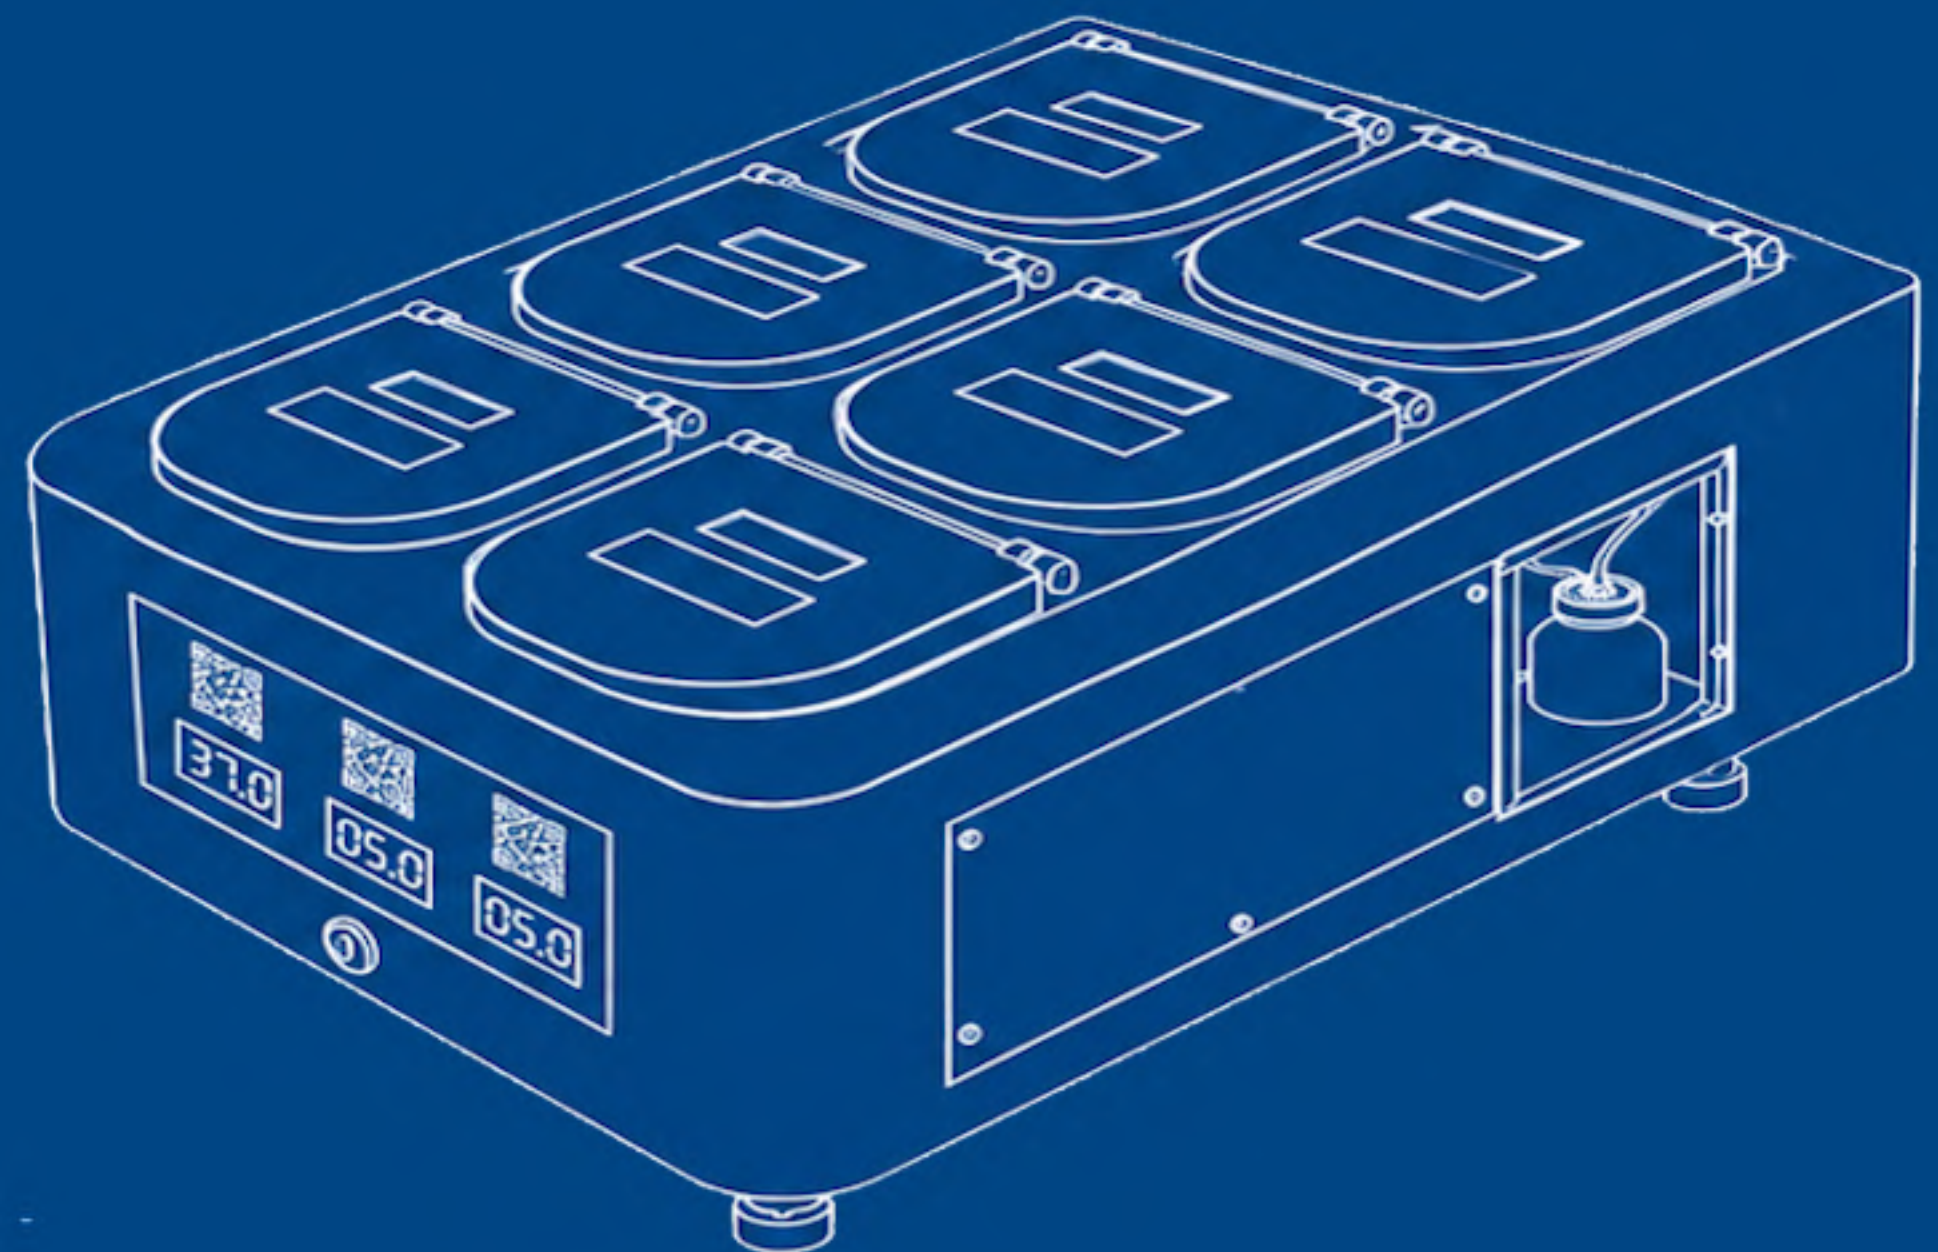

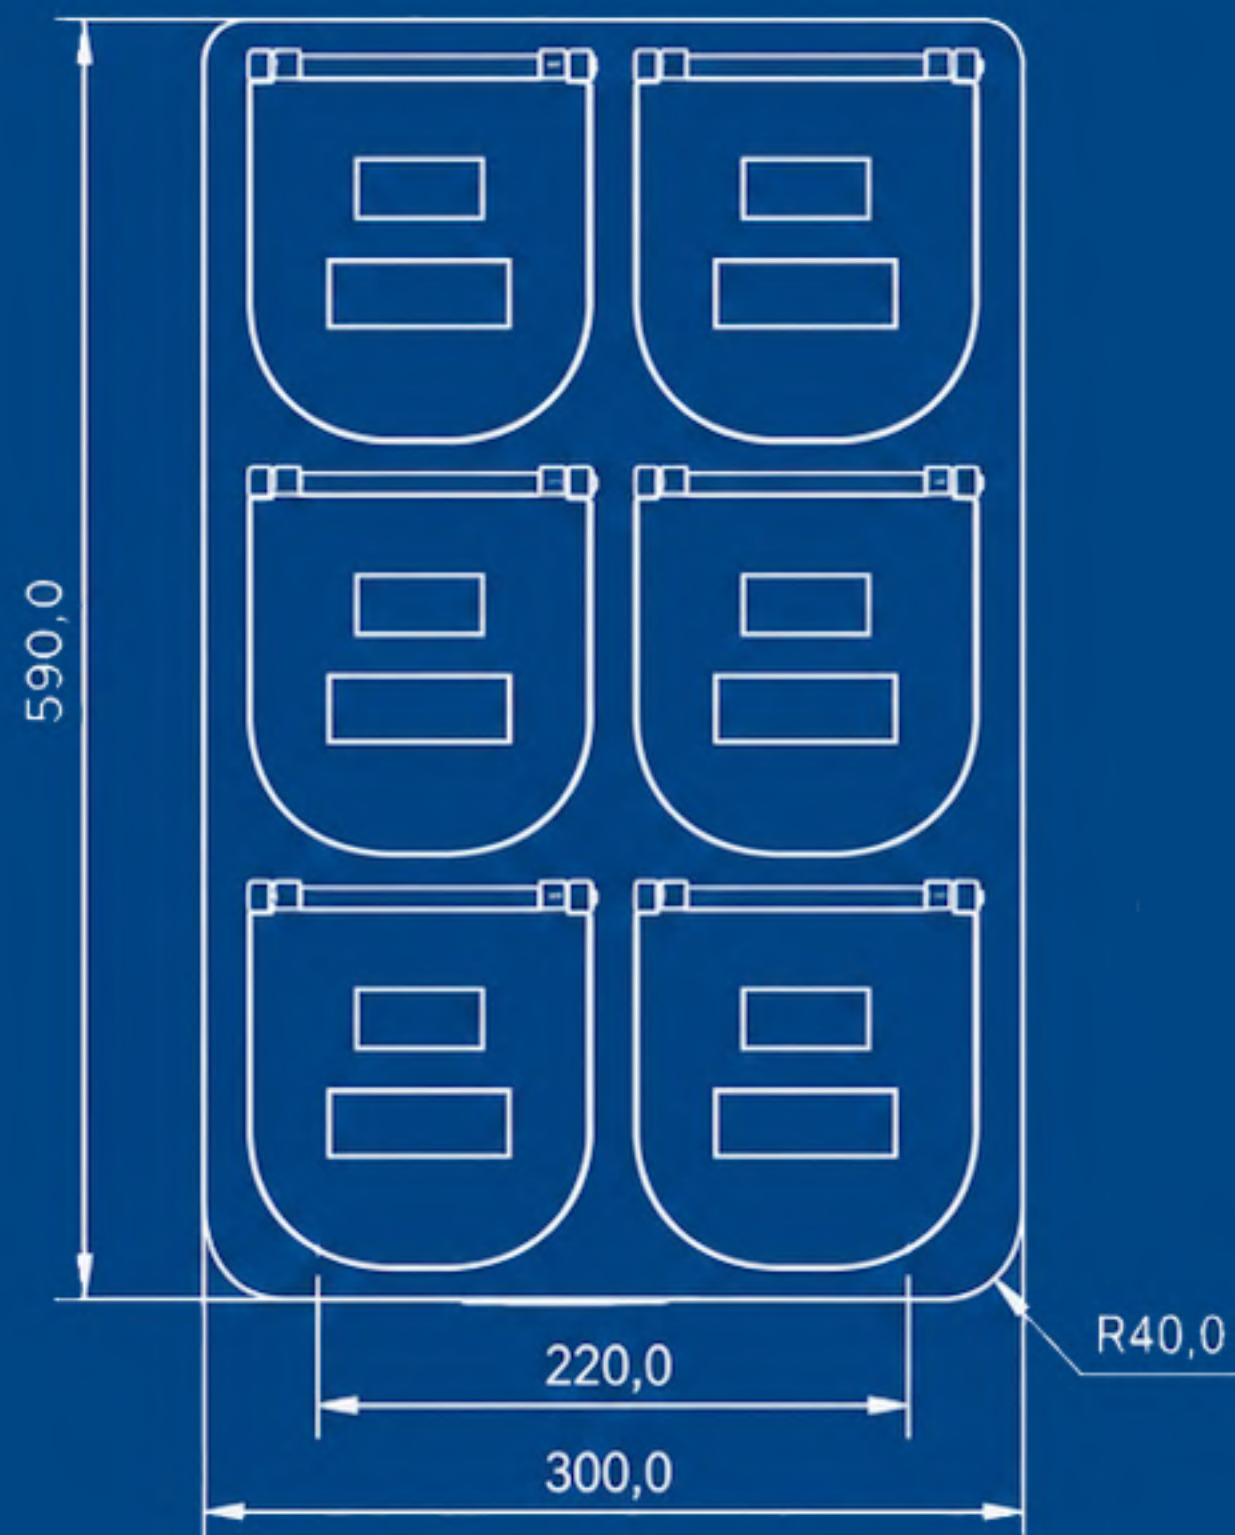

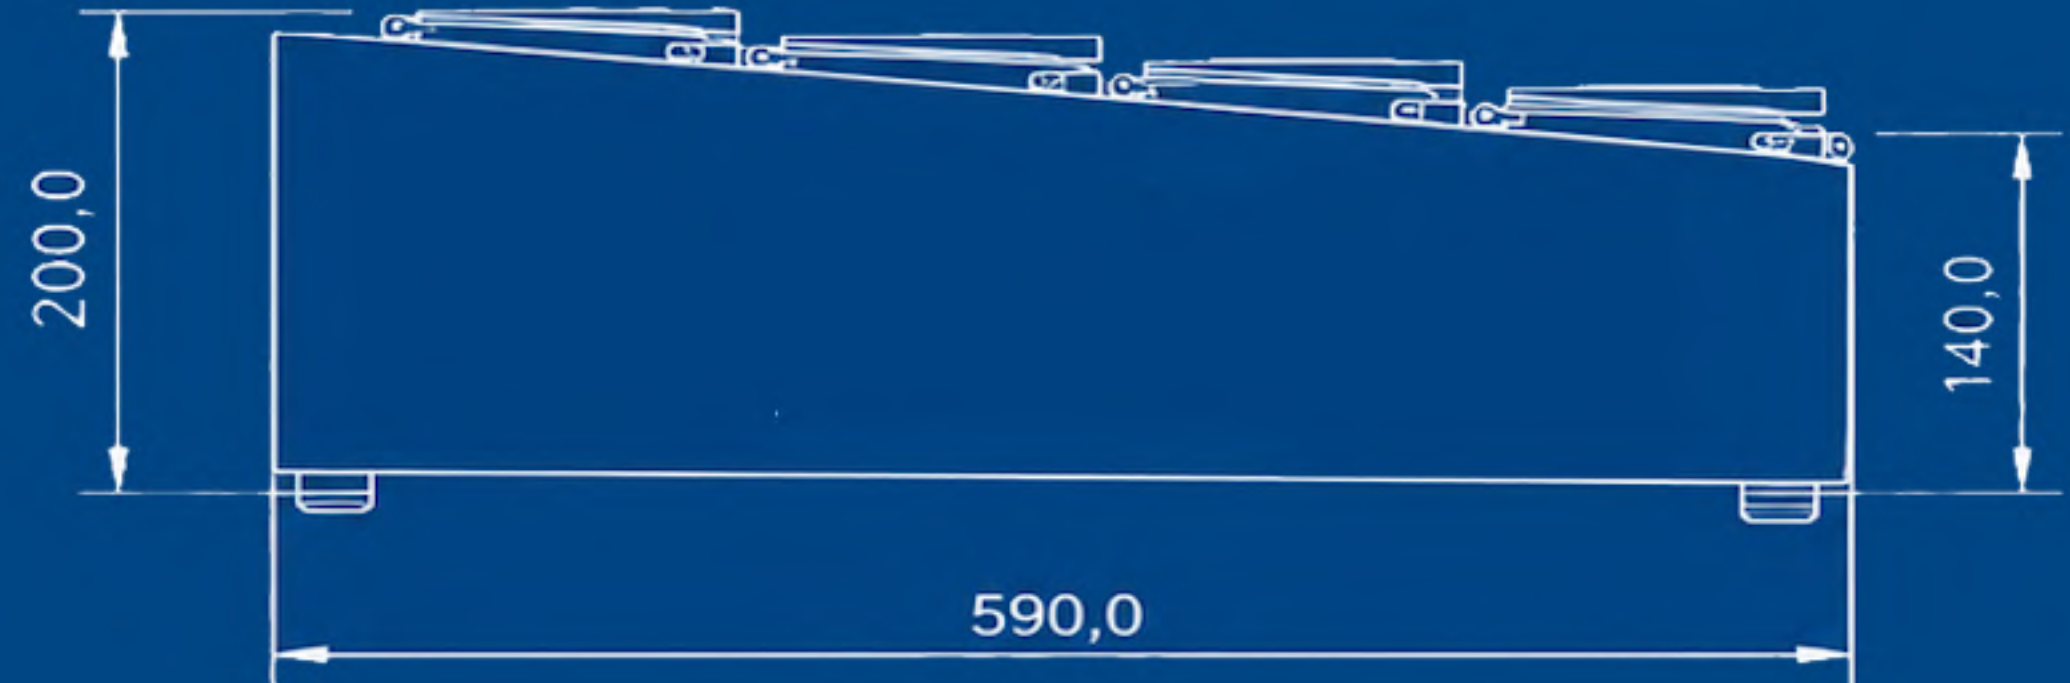

• Flora Humidified

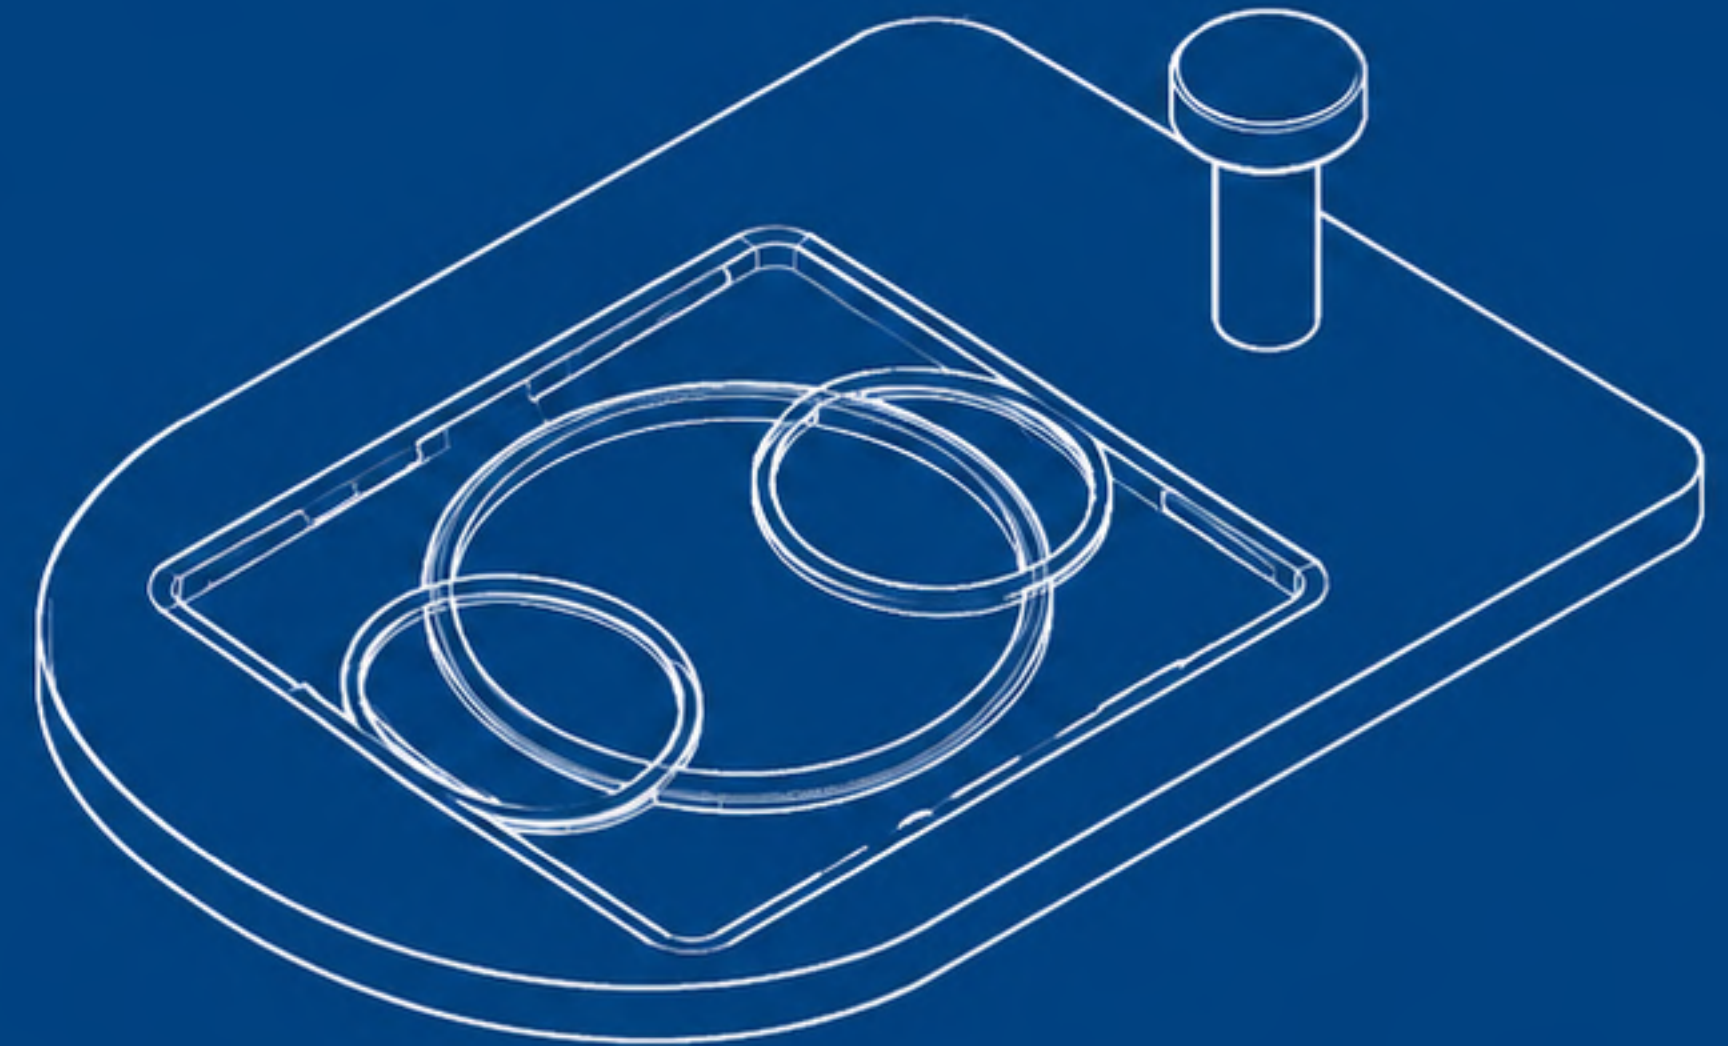

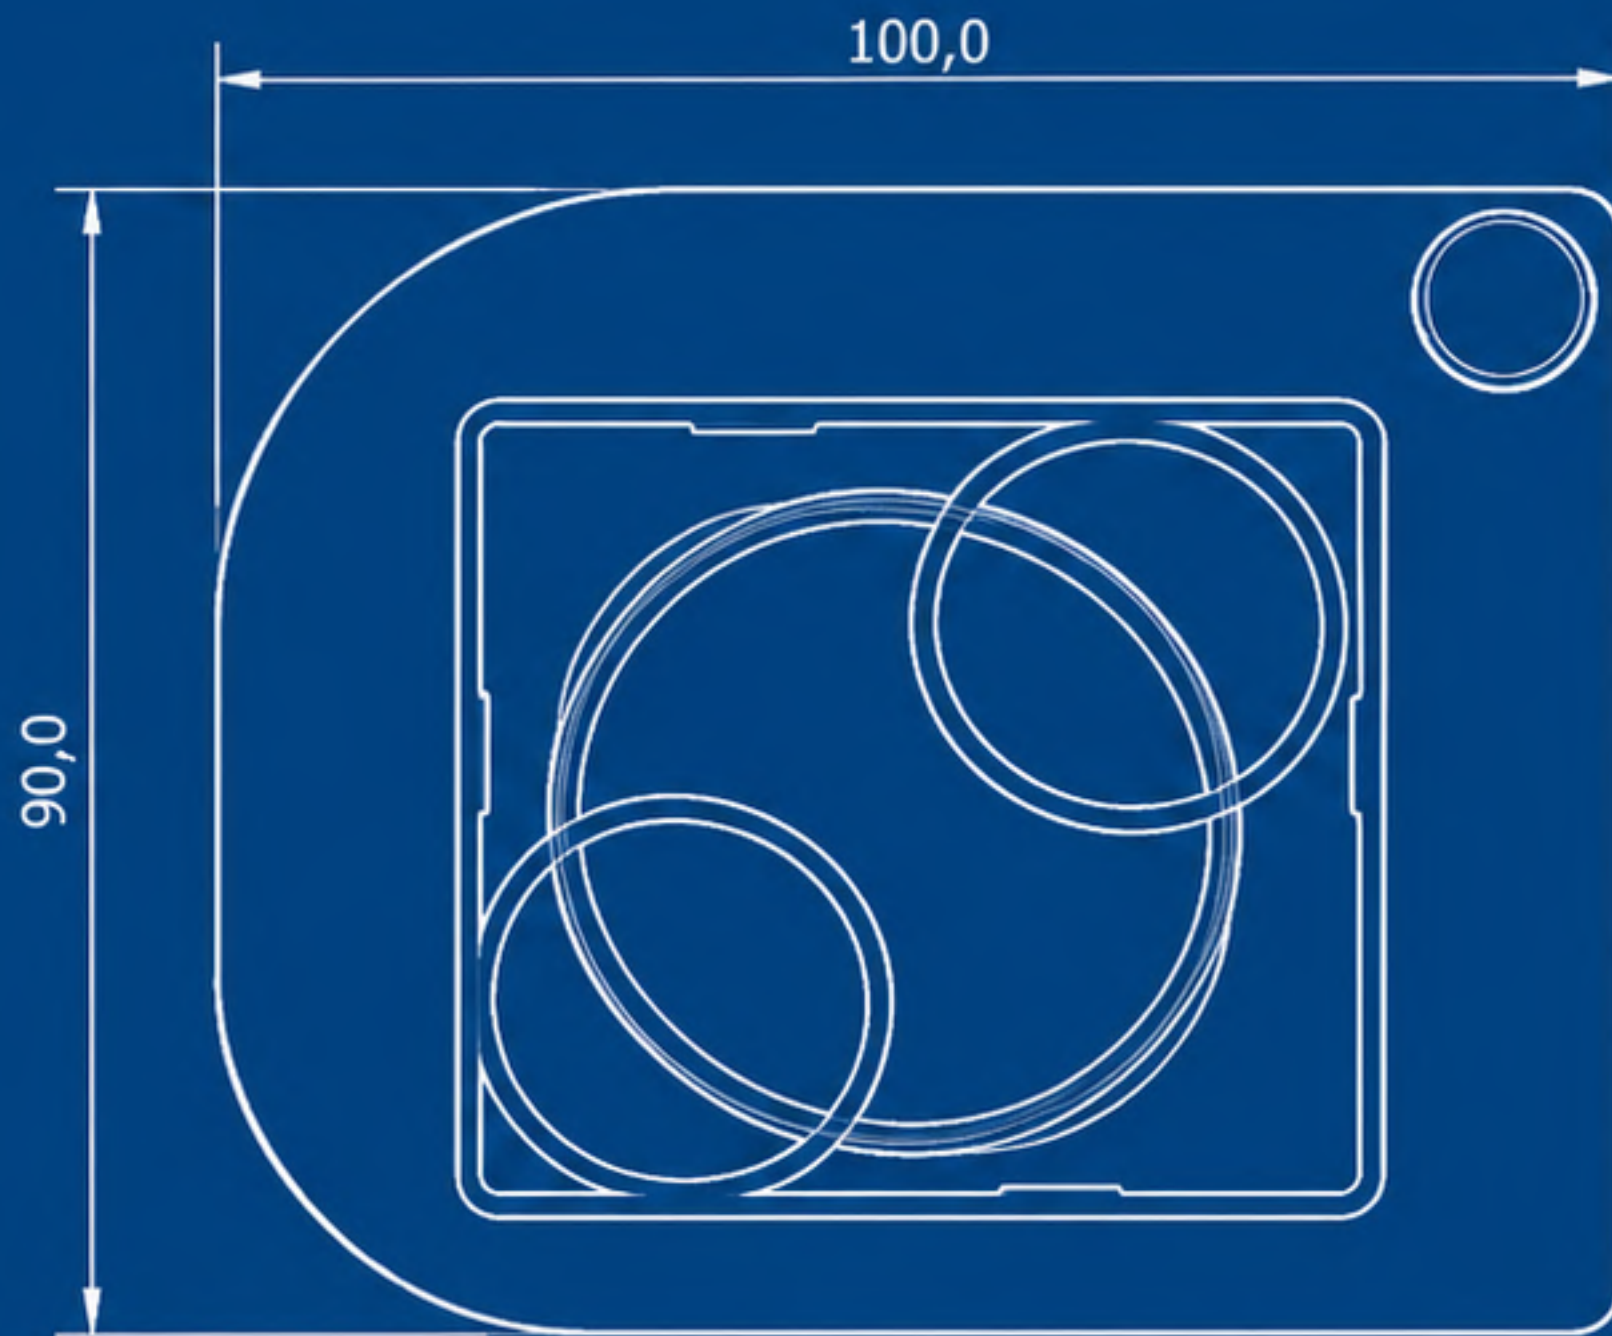

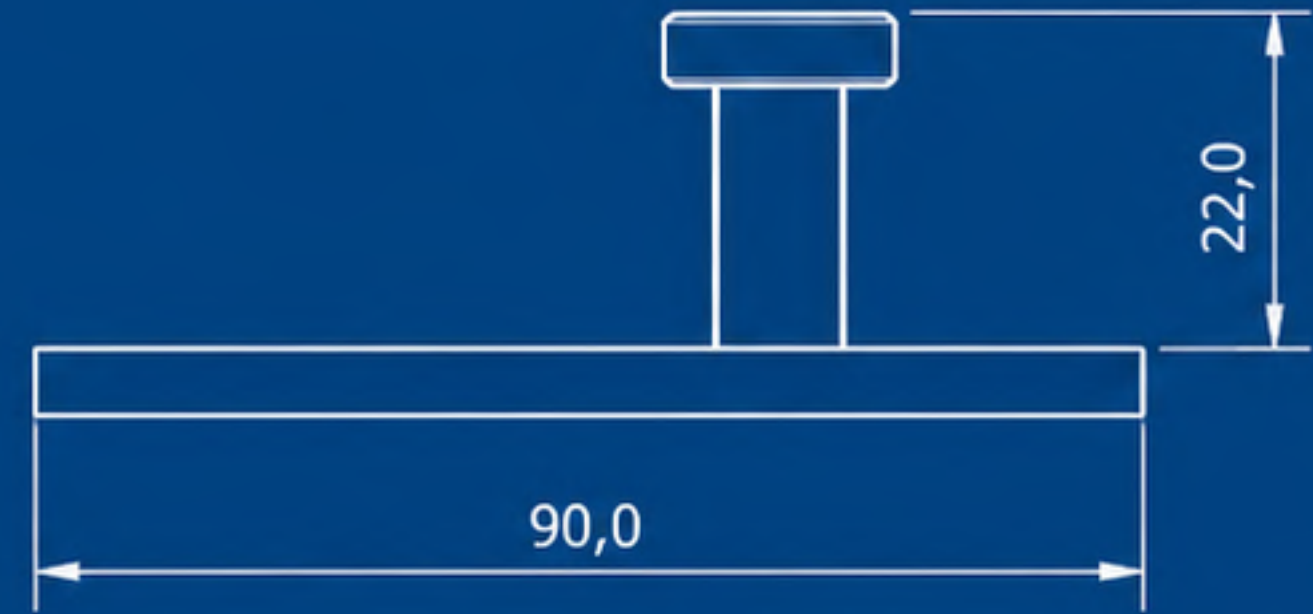

- ◆ Weight: 30kg
- ◆ Power consumption: 280 W
- ◆ 115/230 V 50/60Hz
- ◆ Temperature range
25 - 40 °C
- ◆ Gas consumption
< 1 l/h CO₂
< 4 l/h N₂
- ◆ Gas pressure
0,6 Bar (8m7 PSI)
- ◆ CO₂ range: 1,9 - 10 %
- ◆ O₂ range: 5 - 20 %

Your embryos deserve the best

- **Flora Humidified**
